

## **The Task**

The Prompt Competition invites students to generate an image that visualizes a creative scenario using AI image-generation tools. This year's theme focuses on imagining a future where primary school students in rural Bangladesh experience education with seamless integration of AI technology. The goal is to depict the harmony between cutting-edge AI and the natural rural landscape. The image should:

1. Showcase the integration of AI tools in education.
2. Highlight the cultural and natural beauty of rural Bangladesh.
3. Reflect harmony between technology and the environment.

## **Rules & Guidelines**

1. Participants must use the free version of ChatGPT.
2. Participants are allowed to use a maximum of 3 prompts to generate their final image.
3. Prompts should be concise and relevant to the theme.
4. Submissions must include the exact text of all 3 prompts used.
5. The final image resolution should be at least 1024 x 1024 pixels.
6. The image must be original and created specifically for this competition.

## **Submission Process**

Submit the image and the prompts in the following link:
